Education

Birla Institute of Technology, Mesra

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.34

Ranchi, India

Nov 2020 – Jun 2024

Work Experience

WiseTech Global Pvt Ltd

Software Engineer — CargoWise Enterprise Platform

Jul 2024 – Present

Bangalore, India

NET Platform Migration and Architecture Refactor

- Migrated an internal schema generation tool from .NET Framework 4.8 to .NET 10 across 19 files, significantly eliminating legacy build debt.
- Decoupled 3 core generator classes by introducing an IExcelFile abstraction to replace FlexCel with ClosedXML, applying SOLID principles and Dependency Injection.

JsonMessageInterpreter — Shipping Bill EDI to JSON Display

- Created JsonMessageInterpreter service converting outbound Shipping Bill EDI flat files into structured JSON for debugging and operational visibility.

Schema-to-Message Builder

- Built schema-to-message generation pipelines using XSD, JSON mapping files, XML serialization, and C# code generation for customs EDI integrations.
- Developed CACHE05 Export SB Goods Registration message builder with contract-driven providers and end-to-end serialization validation.

Customs Forms — Validations, Lookups and UI Field Integration

- Implemented customs validations lookups supporting blocking errors, warnings, and compliance message validations within CargoWise workflows.

BIRAC Jancare

Software Engineering Intern

Jul 2023 – Dec 2023

Remote

- Developed blockchain-based Electronic Health Record (EHR) management tool using Solidity and Hyperledger Besu.
- Built RESTful backend APIs and ReactJS dashboards for secure healthcare data workflows.
- Integrated Web3.js services for blockchain interaction and performed API testing using Postman.

Projects

Blockchain-Based E-commerce — Solidity, Fantom Network, Web3.js, MetaMask

- Developed decentralized smart contracts enabling secure blockchain-based product transactions.
- Integrated MetaMask wallet authentication and transaction handling for buyer-seller workflows.

Load Balancer — Java, Spring Boot, AWS EC2

- Built a Java-based load balancer distributing requests across multiple AWS EC2 backend instances.
- Improved backend service availability and throughput using scalable traffic distribution mechanisms.

Technical Skills

Languages: C#, SQL (T-SQL), JavaScript, Solidity, C, C++, Java

Frameworks & Technologies: .NET 10, ASP.NET, Node.js, Express.js, React.js, Web3.js

Cloud & DevOps: Azure, Docker, Kubernetes, CI/CD, Git, GitHub, Postman

Libraries & Tools: CargoWise, UCMP, ClosedXML, NUnit, xUnit, XSD Serialization

Core Concepts: OOP, SOLID Principles, Distributed Systems, REST APIs, TDD, Dependency Injection, Agile

Achievements

- Co-authored the publication “A Blockchain-based Electronic Health Record Management System with PoA Consensus” published as a Springer Nature book chapter at the RAAI Conference.
- Secured 2nd rank internally and qualified for Grand Finals of Smart India Hackathon ACITE.
- Achieved proficiency by solving 500+ DSA questions in C++ on platforms like LeetCode, GFG and Coding Ninja.

Leadership & Extracurricular Activities

- Vice President, Finance Club (2021 – 2024)
- Publicity Head, Rotaract Club (2021 – 2024)
- Executive Member, Dhvani Club (2021 – 2024)
- Head Volunteer, INAE Conclave at BIT Mesra (2023)
